

UNIVERSITY OF BEDFORDSHIRE : MOOT ROOM FIT OUT

*Bringing the Courtroom to Campus: A Bespoke Environment
Blending Design Excellence and Real-World Experience*

When the University of Bedfordshire set out to create a purpose-built Moot Courtroom, they wanted more than furniture — they wanted a space that felt authentic. A place where law students could step beyond textbooks and experience the realities of legal practice in a professional, inspiring environment.

At Design-Led we saw this as an opportunity to craft something exceptional — a space that merges architectural quality, technical precision, and educational purpose.

Understanding the Vision

Every great project begins with listening. Our journey started with a deep dive into the university's vision — detailed site surveys, close collaboration with the facilities team, and discussions about how students, lecturers, and visiting professionals would use the room. This discovery phase ensured the final design would balance gravitas with functionality.

Why Universities Choose Design-Led

I just wanted to send a follow up email to reiterate how happy we are with the work that's been done by Design-Led for our Moot Court. Communication was a breeze throughout, and adjustments were never seen as an issue. Nick, Ric and the team have done a great job of opening the door for a relationship between the University and Design-Led – We hope to work with you again in future.

Design Excellence and Integration

Working hand-in-hand with the university's AV integrators, our design team developed CAD layouts and 3D visualisations that captured the look, feel, and flow of the space. Every element — from judge's bench and witness stand to integrated technology and discreet cable management, meticulously designed to blend modern practicality with courtroom authenticity.

Craftsmanship in Every Detail

We presented material samples and finish options so end users could touch, see, and refine their choices. Once approved, our specialist joinery team produced bespoke pieces — combining durability, precision, and aesthetic refinement to create a space worthy of real-world proceedings.

Seamless Delivery, Lasting Impact

From production scheduling to on-site coordination, our project managers worked collaboratively with the AV and facilities teams to deliver a seamless installation — on time and with minimal disruption to campus life. Following completion, we conducted a full client walkthrough to ensure every detail met expectations.
