## The Alliance Collaboration table offers flexibility for the ever-changing meeting space.

If you do not have a screen on your office / meeting room wall or often rearranging meeting rooms within the business, to save the cost of taking the room out of action for a week while a builder chases cables into the wall and floor then re-decorates and re-carpets the room. Following that you have the AV to install which includes running cables and fitting the screen and bracket, it all takes time and money! Once this work is done the customer uses an off the shelf table which needs a cable port cut into the top. (Some tables will not allow this due to the frame underneath). You could save your customer time and money by supplying the Alliance table which is all self-contained and takes less than a day to install with all the technology. (subject to AV installers being able to install kit the same day)

These come with a rear shield to stop people playing with cables in the back of the screen, or if sat in front of windows they look neat and tidy. We have as standard 3, 5, 7, 9 & 11 seat configurations but as we manufacture, we can tailor to suit your needs.

### The Alliance tables & towers

The Alliance range is the perfect solution for group thinking. It features a table design allowing all participants to clearly see each other and the display screen.

We can incorporate easy screen connection and video conferencing can be incorporated.

At Design Led we have developed a range of innovative solutions designed to enhance the current trend for collaborative working, making the best use of the space available.

### WorkZone tables

These are similar to the Alliance tables but totally constructed of wood, where the screens are inset into a media style wall which also incorporates a connected table. For some larger screens, the unit will need to be fixed back to a wall.

We can make these in any finish from veneers, laminates to melamine's.

## Description: Alliance 3 table

Alliance collaboration VC meeting table to seat 3 people. The table fits a 49" to 55" screen and includes a video conference camera shelf. The screen has a rear steel shield which is removable for service and easy install. The base has 2 steel legs with removable outer panels for cable access. Length 1800mm

## Description: Alliance partition system to make a meeting area

A versatile walling solution for creating meeting areas.

Quadra has designed a partition system which can be put up quickly and can be easily dismantled and stored. The walling is ideal if you have an open plan office and require a meeting space.

We can make these in any finish. The external panels are removable to provide access for cable management across the whole structure.

This allows total flexibility for mounting screens and connectivity within the space.

This is an ideal location to add an Alliance meeting table and screen.
